

# SaviorLabs Launches “TeamCare” to Provide Advanced IT Support

*North Shore managed IT services leader develops custom system to avoid costly downtime for businesses*

**Beverly, MA, October 17, 2017** — Aiming to reduce employee downtime and security concerns, SaviorLabs has launched TeamCare, a new service that they have been developing for over a year. The system provides an advanced level of proactive IT service to their clients. According to the latest 2016 survey from Forrester Research, one in three companies have declared an IT disaster in the past five years. SaviorLabs offers full IT services to businesses on the North Shore of Boston. Are you prepared for an IT disaster?

## **Why is TeamCare Critical to small to medium sized businesses?**

SaviorLabs designed TeamCare, an enterprise-class solution that proactively takes care of patching, virus/malware/ransomware protection, DNS and IP security and monitoring and many more issues. TeamCare provides dependable backups, CIO and helpdesk services 24/7/365. TeamCare is specifically designed to provide employees with technology that “just works”, even if they have full-time IT staff. SaviorLabs provides regular fixed price solutions that allow any size business to have great control over their budget.

The SaviorLabs team was built from a passion to help organizations and businesses grow, mature and plan for the future.

## **Put your business in capable hands**

“We are problem solvers - and that is precisely why we started our company. Building proactive services for our customers is what we do,” said Paul Parisi, Founder and President of SaviorLabs. “Face it - your employees are likely the most significant investment you make every year. It makes sense to give them the best and most efficient

tools to help them get their jobs done. We have put all of our experience and know-how into this platform and our clients are thrilled with the results.”
